1400011	Screw cover	1PCS	1400012	Allen wrench	1PCS
1400013	Supply nipple	1PCS			

INSTALLATION STEPS

1. BEFORE PROCEEDING

WARNING: Read all the instructions completely before proceeding. SUMERAIN recommends calling a professional if you are uncertain about installing this product!, this product should be installed in accordance with all local and state plumbing and building codes.

2. SHUT OFF WATER SUPPLY

Locate water supply inlets and shut off the water supply valves. These are usually found near the water meter. if you are replacing an existing unit, remove the old unit and clean the mounting surface thoroughly.

3. CHECKING THE CONTENTS OF THE BOX

Upon opening the box, check to ensure that all the following items are included.

CODE	ITEM NAME	QTY	CODE	ITEM NAME	QTY
1400001	Rough-in valve	1PCS	1400002	Sleeve	1PCS
1400003	ceramic cartridge	1PCS	1400004	Bonnet nut	1PCS
1400005	Escutcheon	1PCS	1400006	Escutcheon	1PCS
1400007	Escutcheon	1PCS	1400008	Spout	1PCS
1400009	Handle(Lever)	1PCS	1400010	Set screw	1PCS
1400011	Screw cover	1PCS	1400012	Allen wrench	1PCS
1400013	Supply nipple	1PCS			

If any of these items are missing, please contact SUMERAIN consumer service at +86-750-2731579 or email to: supports@sumerain.com

4. VALVE TRIM SET INSTALLATION

4.1 Make a mounting rack (normally use woods as materials) for preparing install the rough-in valve. The mounting rack's face should be 44mm (1-23/32") at least and 54mm (2-1/8") behind the finish wall surface.

4.2 Secure the rough-in valve to the mounting rack with screws (screws not including)

4.3 Turn on your shut-off valve for cleaning the hot and cold water supply tube before connect to the valve trim, allow the water flush 3~5 minutes to flush out dirt and debris. Shut off the water supply again after finish.

4.4 Apply Teflon tape on the thread of supply tube outlet and then connect to rough-in valve with elbow.

Rough-in Valve thread for Hot&Cold water inlet: G1/2" [1/2 BSPP], US, CA customers may require NPT cover to BSPP adapter for connecting (if you could find this adapter please inquiry SUMERAIN support center).

4.5 Install the finished wall.

4.6 Apply Teflon tape on the thread of nipple and then connect to rough-in valve

4.7 Attach the escutcheon to nipple.

4.8 Slide the spout over the nipple and attached to the nipple and fasten by the set screw.

4.9 Slide the escutcheon over the sleeve and attached to the finished wall

4.10 Place handle onto the valve stem and tighten set screws by using the Allen wrench that is provided.(Please don't over tighten), Then attach the screw cover onto handle.

ASSEMBLE FINISHED

6. FUNCTION INSPECTION

6.1 Turn on the handle, the water outflow from the spout and then turn off the handle, the water stop out flowing.

6.2 Turn right the handle, the cold water coming, on the contrary way, turn left the handle, hot water coming.

INSTALL FINISH

CLEARNING RECOMMENDATION FOR SUMERAIN PRODUCTS

Modern lavatory faucets, kitchen faucets, and showers consist of very different materials to comply with the needs of the market with regard to design and functionality. To avoid damage and returns, it is necessary to consider certain criteria when cleaning.

Cleaning Materials for faucets and showers

Acids are a necessary ingredient of cleaning materials for removing lime, however please pay attention to the following points when cleaning faucets and showers:

- Only use cleaning materials which are explicitly intended for this type of application.
- Never use cleaning materials which contain hydrochloric, formic, phosphoric, or acetic acid, as they cause considerable damage.
- Never mix one cleaning material with another.
- Never use cleaning materials or appliances with an abrasive effect, such as unsuitable cleaning powders, sponge pads, or micro fiber cloths.

Cleaning instructions for faucets and showers

Please follow the cleaning material manufacturer's instructions. In addition, pay attention to the following points:

- Clean the faucets and showers as and when required.
- Use the amount of cleaning product and the amount of time recommended by the manufacturer. Do not leave the cleaner on the fixture longer than necessary.
- Regular cleaning can prevent calcification, if scale deposits are noticed on the faucet surface or the spout, you can clean it by a commercial limescale remover, such as Lime-Away® or CLR®. Dilute the remover according to the label instructions.
- The faucets might have some rusty if your faucet under hard water condition, please rub it with aluminum foil dipped in water until the surface is nice and smooth, and wipe it use a small amount of chrome polish or maybe something like car wax (such as Meguiar®, Turtle Wax®) or polish.
- For stainless steel faucet and spout both made of solid stainless, normally this finish has not protective coating on it (in particular waterfall spout inside), stainless steel is by its material nature very tarnish resistant, but by no means tarnish or stain proof. This finish might oxidize naturally over time and react to its environment. Keep your stainless fixture wiped clean and dry and use only a cleaner specifically made for stainless steel (such as Weiman®, CLR®).
- When using spray cleaners, spray first onto a soft cloth or sponge, never spray directly onto the faucet as droplets can enter openings and gaps and cause damage.
- After cleaning, rinse thoroughly with clean water to remove any cleaner residue.

Important

Residues of liquid soaps, shampoos, and shower foams can also cause damage, so rinse with clean water after using.

Please note: if the surface is already damaged, the effect of cleaning materials will cause further damage.

Components with damaged surfaces must be replaced or injury could result.

Damage caused by improper treatment is not covered under the warranty.

TROUBLESHOOTING

Symptom	Solution
Faucet leaks from the handle	A. Tighten the packing nut B. Replace the "O" ring or packing
The water pressure is too low	A. Make sure the water supply valves under the sink are turned on all the way B. Clean or replace the aerator C. Check plumbing system for water pressure problems
The spout sprays water all over	A. Clean or replace the aerator B. Replace the aerator washer
Water is leaking from the faucet under the sink	A. Check the water supply connections to the faucet B. Inspect the water supply lines or hoses for leaks
Handle is loose	A. Remove the cap and tighten the screw B. Locate and tighten the hex set screw C. Remove the handle and check for stripped teeth on the stem.
